

H.D.P.E / GLASSFIBER U.D. TAPE (E.G. BLACK UV RESISTANT)

Thickness (mm):	0,25	0,30
Areal weight (g/m ²):	400	480
Glassfiber content (% by weight):	65 (± 2)	65 (± 2)
Density (g/cm ³):	1,57	1,57
Tensile strength (MPa):	>880	>880
Tensile Modulus (GPa):	30	30
Strain at break (%):	3,5	3,5

Available widths as extruded: 630 < > 650 mm; slitted tapes between 20 and 630 mm.

Other polymers (LDPE and LLDPE) and other thicknesses also available.

Clear or black matrix; other colours upon request; min. order quantities do apply.

*example of application:
glassfiber reinforced PE coil tubing*
